

A few words about us

Due to joy to needlework and creative design, I started in 1995 with the production of porcelain dolls including self-designed and manufactured clothing. But soon I discovered a greater tendency to "bearish" companion and I wanted to make teddies out of felt and mohair.

Of course, my first attempts did not completely convince me; probably because at that time I built them exclusively out of finished cuts without own creativity. So I began to experiment with my own cuts. However, I soon realized that I still ignored some tips and tricks for perfect Bears. Fortunately, I discovered an offer to a teddy college with a one year correspondence course in a teddy bear magazine (master degree as a certified bear-maker). www.margaretenbaer.com

After successful completion, it went around with the ChriLu Bears; now they are successful at international exhibitions, exchanges and competitions.
